

BB15-12

BATTERY BACKUP INVERTER SYSTEM

Barnes Battery Backup Inverter System (BBIS) provides you added protection and peace of mind! The same pump can be on AC or DC power. The BBIS will automatically switch from AC power to DC battery power. (Recommended with either of the following pumps: SP33, SP50, SU25, or SU33)

Features:

- Run the same pump on AC or DC power
- Power lights identify when the pump operating on AC or DC power
- AC line is 115V protected with 15 amps slow acting fuse
- Green LED indicator lets operator know that the battery is not in use and the pump is running on AC power
- Red LED indicator lets operator know that the system is over heating or below 10.5 volts
- Modified Sine Wave Output
