

# Is your pump choking?

This new  
Peerless concept  
lets you operate closer to BEP for less.

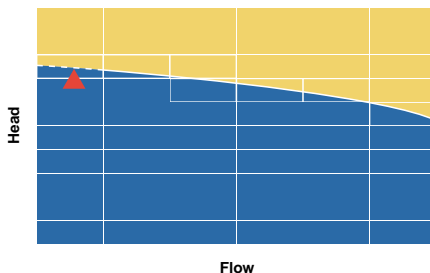

Peerless Pump Company  
has the solution...

PEERLESS® 8196  
LOW-FLOW  
IMPELLER

...Simply swap  
your existing standard impeller  
for the new specially designed  
8196 Low-Flow impeller.

Are you operating  
your Goulds or  
Peerless pump  
choked back on  
the curve, with  
the resulting high  
maintenance costs?

Peerless has a  
solution for you  
that will save  
you money!

## Solution:

- Simply swap your old standard impeller for the Peerless 8196 Low-Flow impeller.

## Benefits:

- Needs no new casing.
- Specially designed for low-flow duties.
- Improved reliability and increased MTBF at these duties.

Did you know  
that if your pumps  
are not operating  
at their  
designed point  
then you may  
see the  
following problems:

Premature seal failure

Early bearing failure

High energy usage

Shaft failure

Excessive down time
