

SETHCO MAGNETIC DRIVE CENTRIFUGAL FILTER SYSTEMS

FOR
CORROSIVE LIQUID
FILTRATION

A Division of Met-Pro Corporation

DPM/KPM SERIES

- 15 sizes with filtration rates from 1 to 4500 GPH.
- Magnetic drive, sealless pumps provide leakproof operation. Each pump is selected for optimum filtration rates.
- Standard chambers are CPVC construction. Kynar construction is available on several models.
- Typical applications include electroplating, pharmaceutical, photographic, radioactive and other sensitive solutions.
- Chambers accept all standard open ended filter and carbon tubes.
- Systems are provided fully assembled and tested with all accessories required for immediate start-up.
- All units are mounted on a rigid corrosion resistant panel. Single tube systems feature panels on rubber bumpers. All multi-tube models are supplied with ball bearing swivel casters.

**MODEL DPM-800
EIGHT TUBE SYSTEM**

**MODEL DPM-2400
EIGHT TUBE SYSTEM**

**MODEL DPM-30SB SINGLE TUBE
SYSTEM WITH OPTIONAL
"SEE THRU" SHELL**

**MODEL DPM-01SB
SINGLE TUBE SYSTEM**

*Three new sizes for
flow rates to 4500 GPH*

Optional pressure
gauge assembly
available for most units

**MODEL DPM-2400
EIGHT TUBE SYSTEM**

WARRANTY: One year warranty against defective parts and workmanship. See Form TC-01 for full warranty details. Always be specific about your application in order that proper materials may be furnished. Let Mefiag or an authorized distributor know: liquids being handled, gallons, temperature and pH.

The standard warranty does not apply when equipment is used contrary to factory recommendations.

Since the policy of Mefiag is one of continual improvement, we reserve the right to change design or materials at any time, without giving notice or creating any obligation to previous or future customers.

† add approximately 20% for shipping weight. †† same as unit above with 50% more surface area.

NOTE: Kynar filter systems are provided with Kynar pipe and union to connect chamber inlet and outlet. No other accessories are provided.

Each Sethco Magnetic Drive Filter System is provided with a leakproof polypropylene, magnetic drive, sealless centrifugal pump. All standard polypropylene systems are suitable for temperatures to 180° F. Kynar® system are available for temperatures as high as 210° F.

Each system includes inlet and outlet hose, hose clamps, a set of 15 micron filter tubes, and operation manual for immediate start-up. Every unit is pre-tested to insure proper operation. Single phase motors are provided with grounding plug and overload protection.

All Sethco Magnetic Drive Filter Systems feature no metal contact with solutions to insure long life, dependability, and leakproof operation for most hard to handle applications. See price list for optional items.

FILTER CHAMBERS

CPVC filter chambers are standard on most systems. Single tube systems can be provided with "see thru" Lucite® or PVC shell (Maximum temperature of "see thru" chambers is 140°F). Kynar construction is available on some models. All chambers accept economical, standard open ended filter tubes or carbon filter tubes.

† See price list for available electrical characteristics.

Note that 50 Hertz motors reduce filtration rates by approximately 20%

FILTER TUBES

Polypropylene, or Cotton, depending on application. Filter tubes are available for controlled filtration from 150 microns to .5 micron. Standard densities are coarse (50 microns), medium (25 microns), fine (15 microns), X-fine (10 microns), Special B (1-3 microns), and Special C (.5 micron). All systems are supplied with 1 set of 15 micron polypropylene tubes. For complete specifications on filter tubes, see Bulletin 901. For carbon tubes, see Bulletin 913

NOTE: For self priming magnetic drive filter systems see bulletin 742.
