

# MODEL 3419

## Seat belt load cell

Capacity available 3,500 lbs.\*

\*Please note: calibration will be performed to 2,500 lbs.

### FEATURES :

- Small size
- Installs without "threading"
- Low sensitivity to belt thickness change

The Lebow® seat belt sensor features improved accuracy. Calibration is essentially independent of belt thickness, which may change under load. It's so simple to install. Just remove the pin, lay the belt on the transducer and replace the pin.

It provides excellent repeatability without the need for the extensive belt wrap required on previous models.
