The PT9101 is a work-horse for demanding long-range applications requiring a linear position measurements in ranges up to 1700 inches. Available with either a 500, 1K, 5K, or 10K ohm potentiometer, the PT9101 operates with any basic panel meter or programmable controller.

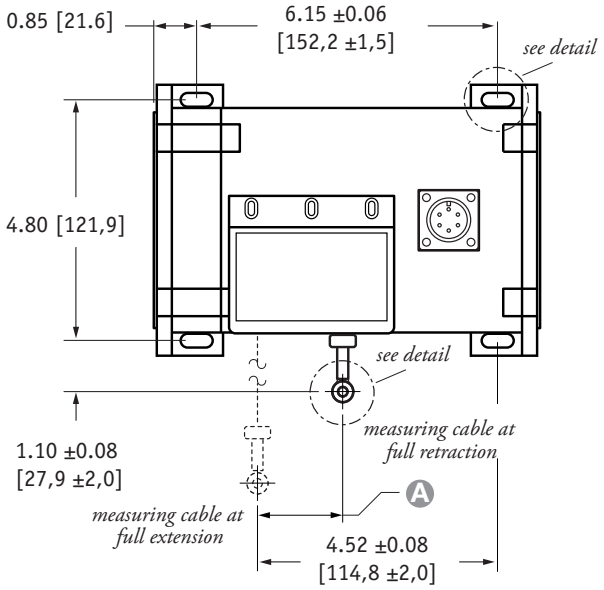

As a member of Celesco's innovative family of NEMA 4 rated cable-extension transducers, the PT9101 offers numerous benefits. It installs in minutes, works without perfect parallel alignment, and when it's stainless-steel cable is retracted, it measures only 6".

VLS Option - Free Release Protection

The patented Celesco Velocity Limiting System (VLS) is an option for PT9000 Series cable extension transducers that limits cable retraction to a safe 40 to 55 inches per second for the single spring option and 40 to 80 inches per second for the higher tension dual spring option.

The VLS option prevents the measuring cable from ever reaching a damaging velocity during an accidental free release. This option is ideal for mobile applications that require frequent cable disconnection and reconnection. It prevents expensive unscheduled downtime due to accidental cable mishandling or attachment failure.

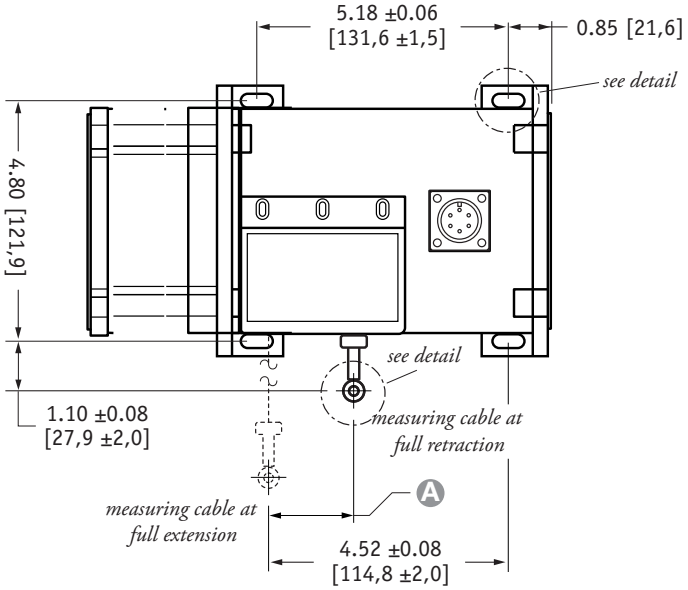

How To Configure Model Number for VLS Option:

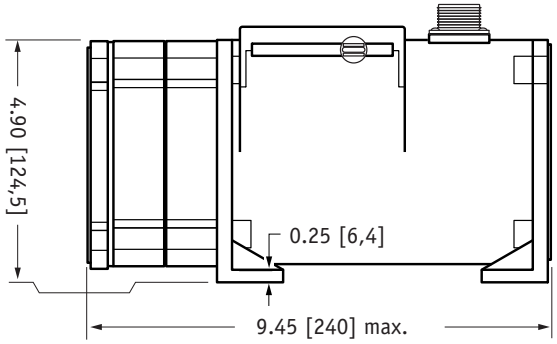

VLS 9101- ____ Ⓡ **-** ____ Ⓐ ____ Ⓑ ____ Ⓒ **-** ____ Ⓓ ____ Ⓔ ____ Ⓕ ____ Ⓖ

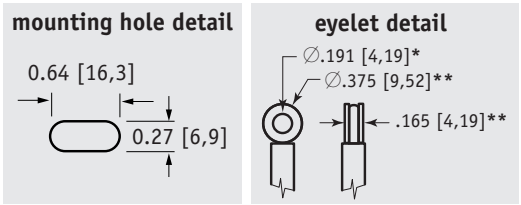

creating VLS model number (example)...

1. select PT9101 model — **PT9101-0100-111-1110**
2. remove "PT" from the model number — ~~PT~~ **9101-0100-111-1110**
3. add "VLS" — **VLS + 9101-0100-111-1110**
4. completed model number ! — **VLS9101-0100-111-1110**
