USER MANUAL

The floating level switch is capable for directly controlling pumps.

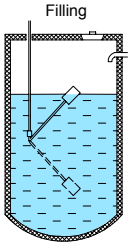

ELECTRICAL CONNECTIONS

Emptying

State of contact when the float is down:
BLUE wire ⇒ **CLOSED**
BLACK wire ⇒ **COMMON**
BROWN wire ⇒ **OPEN**
Operation of contact:
BLUE-BLACK wire ⇒
closes, when the level is down
BLUE-BLACK wire ⇒
opens, when the level is up

Filling

State of contact when the float is up:
BROWN wire ⇒ **CLOSED**
BLACK wire ⇒ **COMMON**
BLUE wire ⇒ **OPEN**
Operation of contact
BROWN-BLACK wire ⇒
closes, when the level is up
BROWN-BLACK wire ⇒
opens, when the level is down

MAX. LOADABILITY OF THE CONTACT: 8A, 250 V AC
REMEMBER TO INSULATE THE WIRE THAT IS NOT USED !

USING THE COUNTERWEIGHT
Insert the cable in the counterweight from the conical side and rotate it thus, causing the plastic ring to break out (if necessary, remove the plastic ring with the help of a screwdriver). The ring should then be positioned on the cable at the point where it is desired to block the counterweight. Force the counterweight on the ring by rotating it, using a slight pressure.

Cancoppas provides quality instrumentation solutions that increase your productivity and efficiency.

SERVICES
- Maintenance Contracts for continued year-in and year-out reliability
- On-site field calibration services for ultimate accuracy
- Bench Repair Shop with factory trained technicians

ENGINEERING Our in-house engineering department offers professional panel design, fabrication, PLC programming including “turn key” system design and integration.
